Claims 33 and 34 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.

Claims 31 and 32 are hereby rejoined with Group I. Applicants are correct (paper no. 5, page 1) that claims 31 and 32 ought to have been included in Group I.

Applicants' traversal (paper no. 5, pages 2-3) of the requirement for restriction is improper is not persuasive. Applicants argue that ten independent and distinct nucleotide sequences (along with one pair of primers for each of the distinct nucleotide sequences) should be examined on the merits as outlined in Examination of Patent Applications Containing Nucleotide Sequences, 1192 OG 68 (November 19, 1996) and MPEP § 803.04. At the time of the O.G. notice, the size of nucleotide sequence databases was considerably smaller than it is now. For example, in 1996 GenBank® contained about 6.52×10^8 nucleotides in its main database, while in 2001 the same database contained about 1.58×10^{10} nucleotides. This represents a 25-fold increase in GenBank®, which continues to double about every 14 months (figures from <http://www.ncbi.nlm.nih.gov/Genbank/genbankstats.html>). The increasing size of this and other sequence databases no longer makes it practicable for the USPTO to use sequence search resources to search more than one unrelated nucleotide sequence in a single application. Accordingly only SEQ ID NO: 32 its primer pair of SEQ ID NOs: 124 and 125 as selected by applicants in paper no. 5 have been examined on the merits.

The drawings are objected to because of the reasons listed on form PTO-948 attached to this Office action. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correcti n of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this

Art Unit: 1631

information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.185(a). Failure to take corrective action within the set (or extended) period will result in **ABANDONMENT** of the application.

The disclosure is objected to because of the following informalities: the parent application and its status should be mentioned in the first sentence of the application.

Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are vague and indefinite because they claim more sequences than were elected by applicants for examination on the merits.
